Having Global Reach alongside us was very comforting and the service they provided was much broader than just FX management. We felt really thankful for Global Reach, everyone was helpful, proactive, and positive. Global Reach helped us get the project set up and established at a strategic level, as well as helping us manage the day to day transactions of the operation and the exposure that comes with a big international project. What we liked was that it wasn't just a core FX business, and we were able to test other parts of the services Global Reach offer, such as establishment, managing risk, and transaction.'
